

Task 4 Report – Basic Chatbot Using Python

Title

Basic Chatbot Using Python

Objective

To develop a simple chatbot that interacts with users and responds to predefined messages.

Tools Used

- Python
- Google Colab

Description

The chatbot accepts user input and provides predefined responses for greetings and simple questions using conditional statements and loops.

Features

- Responds to greetings (Hi, Hello)
- Answers simple questions
- Exit command to stop the chatbot
- User-friendly interaction

Conclusion

This project helped in understanding Python basics, conditional statements, loops, and chatbot development concepts.
